EXECUTIVE SUMMARY

Computer Science undergraduate with hands-on experience in Data Analytics and SEO, seeking a Data Analytics and SEO role. Proficient in Python (Basic), SQL, and Excel for data cleaning, analysis, and reporting. Experienced in live SEO execution, keyword tracking, and turning data into clear business insights. Strong communicator with inter and intra-collegiate recognition in presentation and public speaking — well-equipped to deliver insights effectively across teams. A fast learner with a strong willingness to adapt, grow, and take on new tools and responsibilities, making me a confident and ideal fit for this role.

TECHNICAL SKILLS

Programming: Python (Basic), SQL

Analytics Tools: Excel (Pivot Tables, XLOOKUP), Google Sheets

Competencies: Data Cleaning, Data Visualization, Business Insights, SEO Analytics

ACHIEVEMENTS

- **Second Place, PPT Presentation — Inter-Collegiate Meet:** Recognized for clarity, structure, and visual storytelling in a competitive multi-college setting.
- **Third Place, Pick and Speak (Spot Topic) — Intra-Collegiate Meet:** Demonstrated strong impromptu communication and critical thinking under competitive conditions.

EXPERIENCE

Digital Marketing & SEO Intern — AapkaBazar

Jan 2026 – Present

- Implemented off-page SEO strategies to improve domain authority and organic traffic.
- Analyzed keyword rankings, backlink performance, and search visibility trends.
- Generated insights from SEO data to support digital marketing strategy.

Data Analyst — Jyeshta

Dec 2024 – Feb 2025

- Cleaned and structured datasets using SQL and Excel to improve reporting accuracy.
- Performed trend analysis and customer segmentation to identify business opportunities.
- Created analytical reports for performance monitoring.

PROJECTS

Trader Performance vs Market Sentiment

Python, Pandas, Scikit-learn, Matplotlib | github.com/Nesha57/trader-brhavior-insights

- Analyzed 250+ real Hyperliquid trades against Bitcoin Fear/Greed Index (Feb 2024 – Mar 2025).
- Merged and aligned two datasets by date; engineered daily metrics including PnL, win rate, trade frequency, long/short ratio, and drawdown proxy.
- Discovered trader earns significantly higher profits on Greed days vs Fear days through statistical t-tests and visualizations.
- Applied KMeans clustering to segment trading days into High-Performance, High-Drawdown, and Neutral patterns.

- Built Gradient Boosting predictive model to forecast next-day trader profitability using sentiment and behavioral features.
- Proposed 2 actionable strategies: Sentiment-Gated Risk Reduction and Greed-Phase Profit Lock-In.

EDUCATION

B.Sc Computer Science with Data Analysis

Vellalar College for Women | 2024 – 2027 | CGPA: 7.9 / 10 — First Class with Distinction
